PURPOSE

Create a healthy farming community by delivering high quality seeds and related farming solutions.

VISION

To be a global leader in high quality seeds, that help our customers and other stakeholders, backed by innovative technology.

MISSION

Work closely with customers, offer innovative products and solicitous stewardship.

Brinjal

HYB VAISHALI

Medium tall plant, round fruit with purple colour, fruit weight 350-400gm, good fleshy green calyx with purple tinge.

HYB SHYAM

Tall and strong plant, big oval fruit 300-350 gm weight in glossy dark colour. Thick and green coloured calyx.

HYB GARGI

Plant tall and spreading, dark purple long cylindrical fruits of 150-160 gm weight.

Very good bearing and heavy yielder.

HYB HARIYAALI

Plants erect to semi erect, with very strong stem. Fruits 20-25 cm long and cylindrical with weight of 90-100gm.

HYB AISHWARYA

Plant medium tall, fruits club shaped, dark purple colour, 130-150 gm.

HYB RONITH CHU-CHU

Plant tall and spreading , dark purple long cylindrical fruits of 150-160 gm weight.

Very good bearing and heavy yielder.

HYB MAHARAJA

Plants bushy , with green foliage and strong stem. 100-110 gm oval green fruits with white blotch at the bottom. Cluster bearing fruits ready to harvest in 80 days.

HYB MITHUN

Tall vigorous plants, fruits oval round in shape, spiny, purple with white streaks, fruit weight 90-100 gm, very high yielder.

HYB Mr. GREEN

Plants erect and medium tall with early fruiting habit.
Fruit weight 250-300 gm, oval shaped with attractive green colour.
Green bharta type fruits.

HYB ODISHA PRINCE

Plant semi erect and vigorous, fruits oblong to club shaped, green with white blotch and streaks at bottom.
Fruit weight 90-100gm. Very high yielding and cluster bearing.
Wilt tolerant.

HYB WHITE BEAUTY

Plants bushy and very strong, fruit is shining white, oval round with excellent bearing.
Fruits weigh 80-90 gm.
Harvesting starts at 60-65 days.

HYB PARI

Plant semi erect, fruits attractive pink coloured, 90-100gm weight, 14-15 cm long, calyx green and non-spiny, excellent and continuous bearing for longer period.

Okra

HYB NEHA PLUS

Crop duration : 90-100 days, Day to 1st harvest : 45-50 days, Plant height : 140-150 cm, Fruit colour : Lush Green, Fruit Length : 10-12 cm, Ridges: Five – conspicuous, YVMV , OLCV : Tolerant, Good for long distance transport Excellent productivity.

SHITAL

Tall, green, good branching, narrow leaves, fruits green, medium long with medium girth, early maturity, 45-50 days from sowing. High yield and good shelf life.

HYB RHOK 7002

Plant medium tall, strong stem, fruit five ridged, dark green coloured, medium with good girth, smooth and tender with good transportability and shelf life. Early maturity 40-45 days. Highly tolerant to YVMV and ELCV disease.

HYB RHOK 7003

Plant tall, good branching, strong stem, medium broad leaves, dark green coloured. Medium maturity 45-50 days. Highly tolerant to YVMV and ELCV disease.

Cabbage

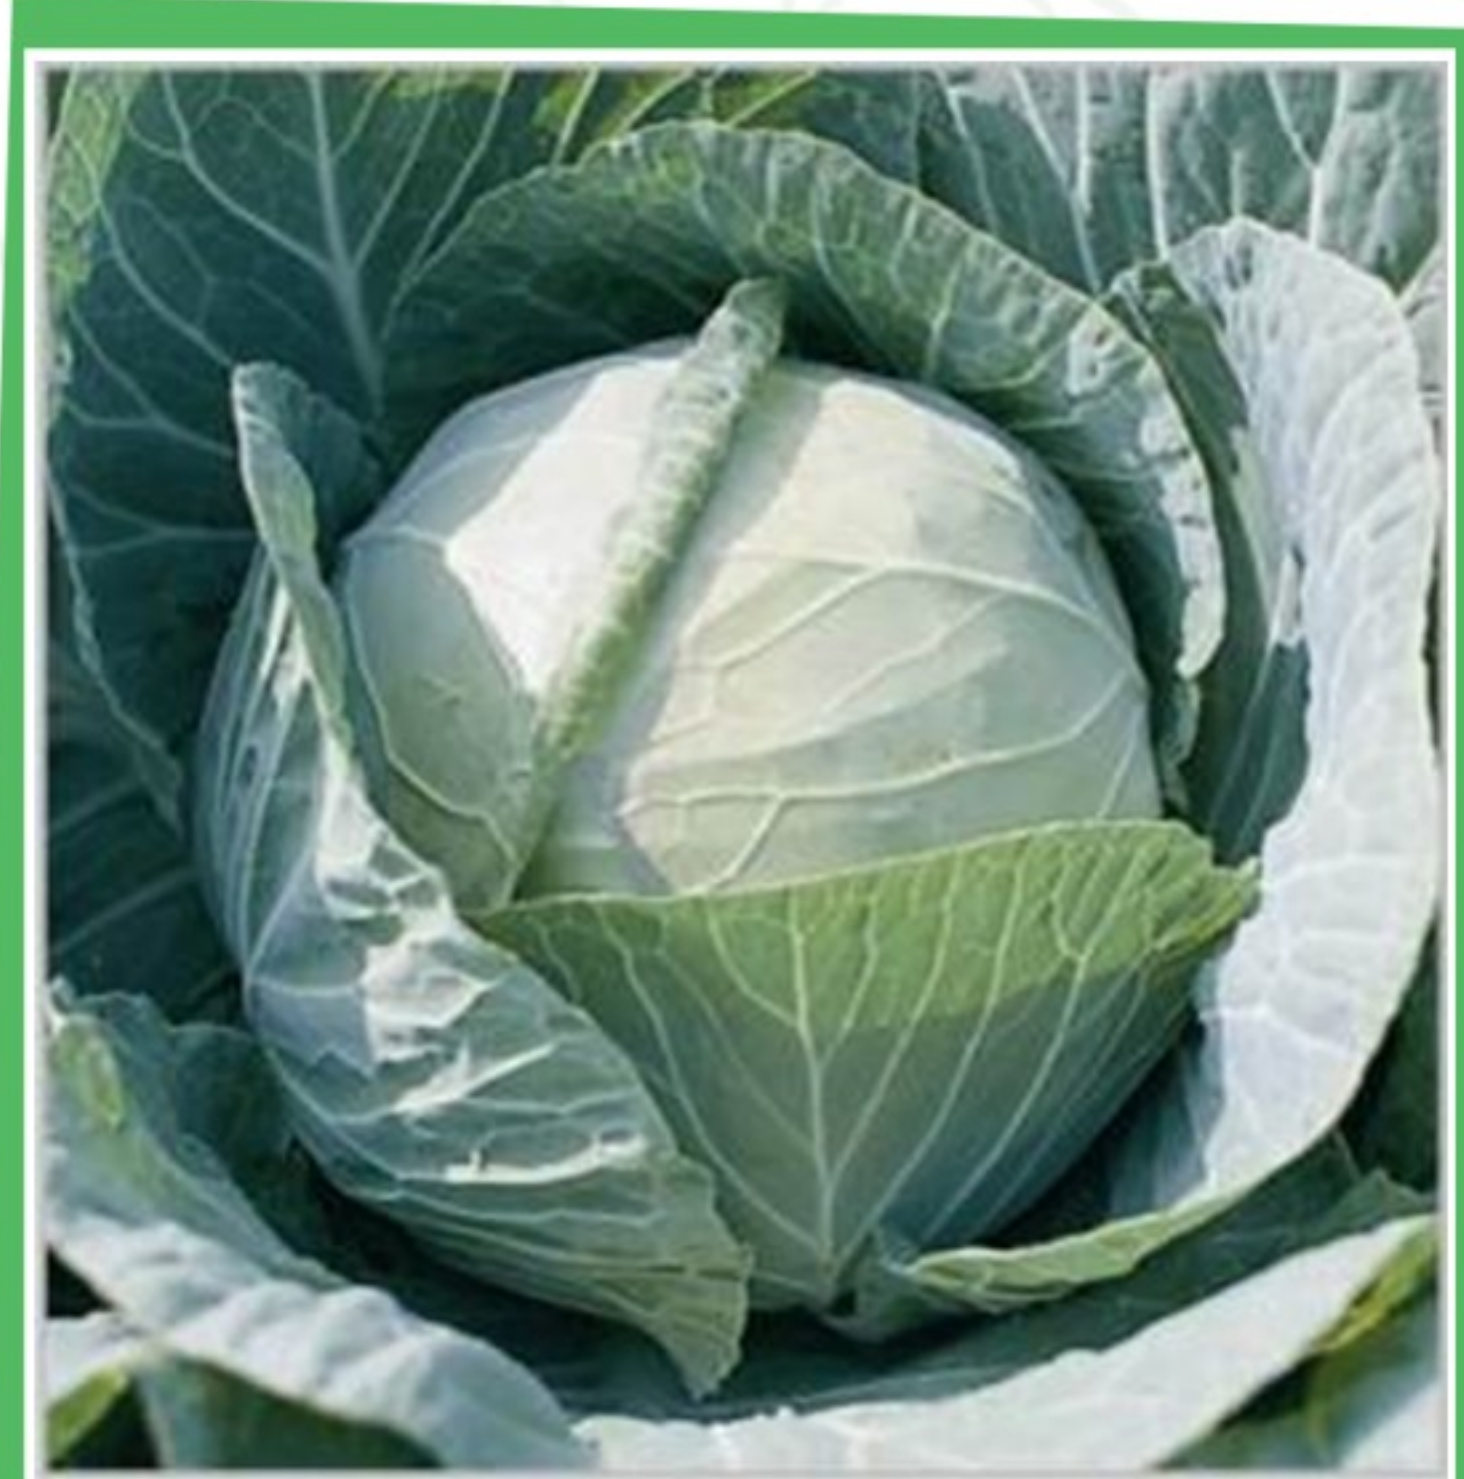

HYB GLORY

Very early hybrid, matures in 50-55 days after days of transplanting. Weight of head 700-800g. Excellent for early season to middle season.

HYB MAGIC

Dark bluish-green, round head of 1.25 kg to 1.50 kg which matures in 75-80 days, with excellent firmness and small core.

HYB GREEN GOLD

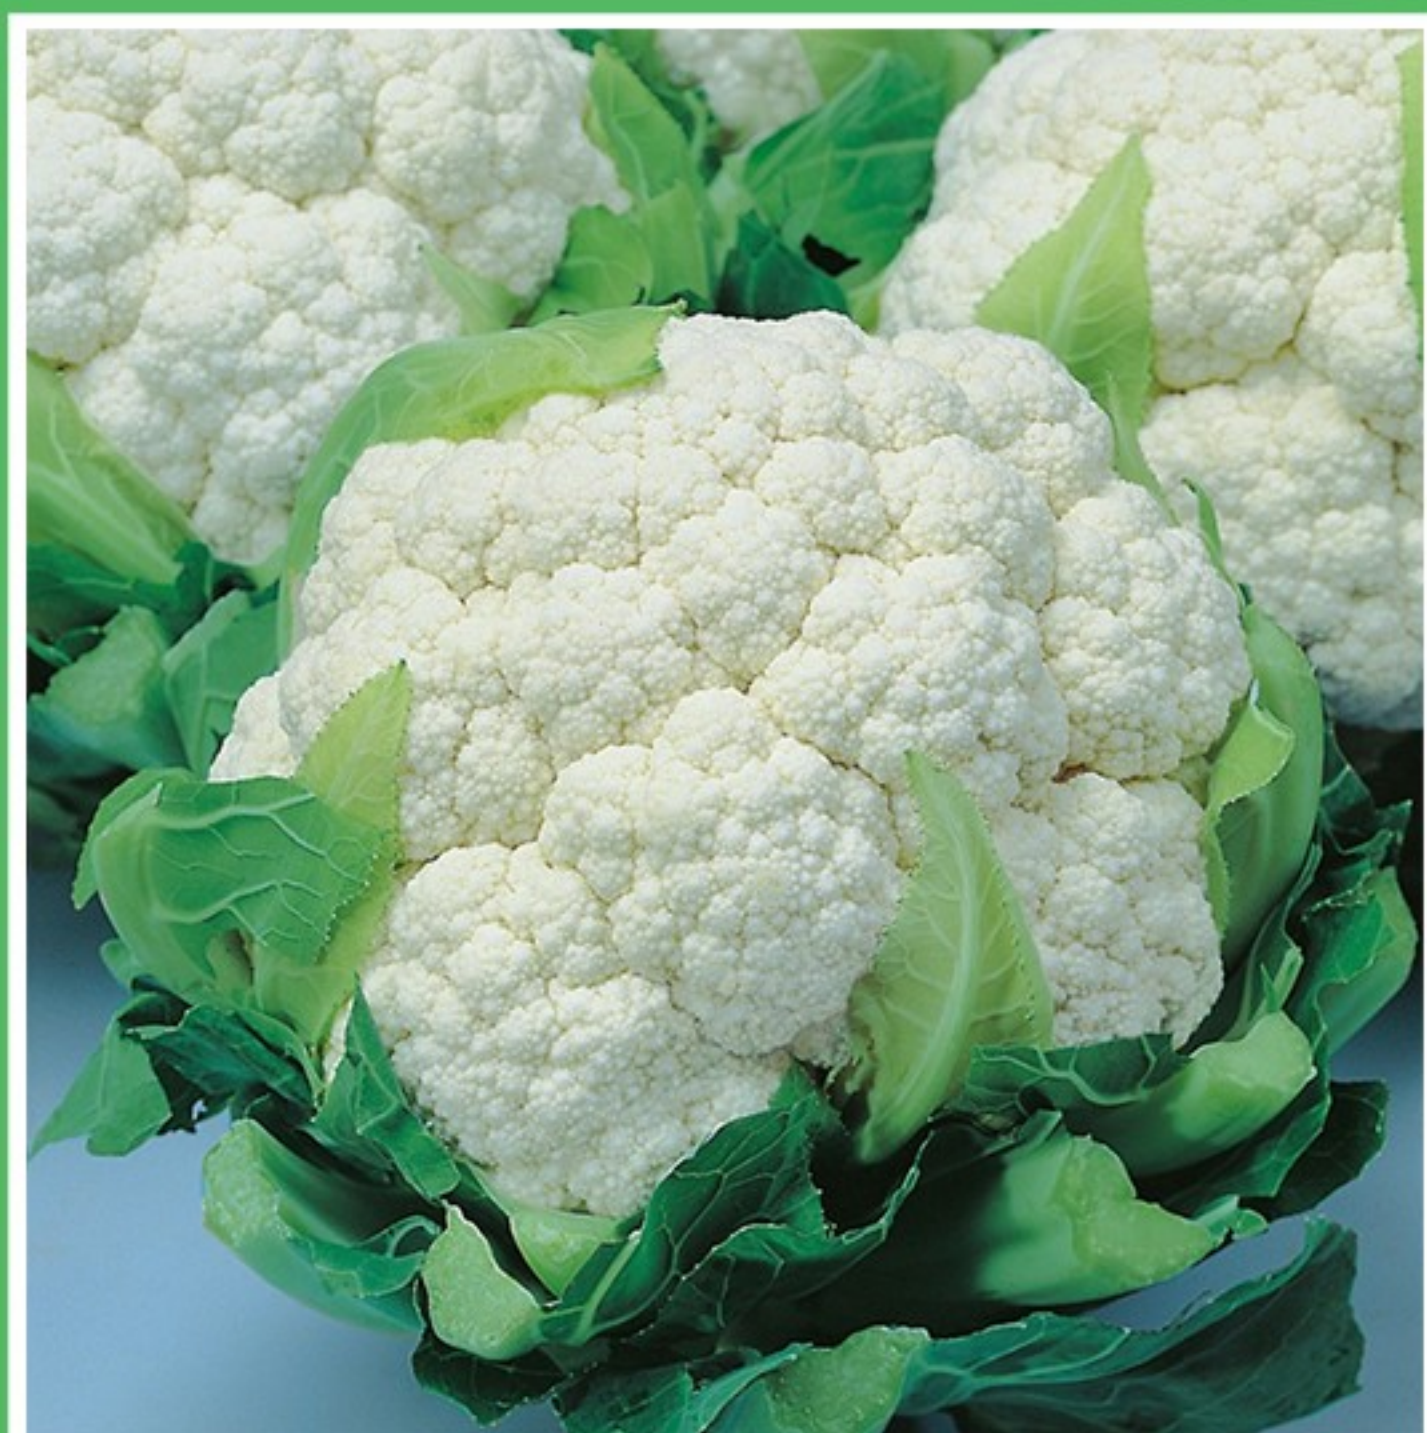

Maturity 60-65 days, 800-900g, compact, bluish-green head. Good in transportation and shelf life.

Cauliflower

HYB ROSHNI

Erect plant with medium size frame, 800-900g white curd, ready for harvesting in 65-70 days.

SAVERA

Plant erect to compact. Curd weight 600-700g, creamy white, mature in 60-65 days. Suitable for early sowing.

HYB KALPANA

Erect plant, open frame, long leaves, curd weight 800-1000g. Suitable for late, early and mid group sowing.

HYB CHANDRAMUKHI

Plant spreading type, green foliage with good self blanching, Curd ready for harvest in 70-75 days with a weight of 1–1.25 kg.

Knol Khol

WHITE VIENNA

Round to flattish round, light green knob, matures in 60 days after transplanting with 200-250g weight, only few leaves with thin petiole.

HYB CLEOPETRA

Vigorous vines, broad dark green leaves, long cylindrical bicolour, light green fruits of 250-300g weight, tasty and crispy, start harvesting in 45 days. Highly tolerant to mildews.

Tomato

HYB RHT 1001

Determinate growth
Fruits : No Green Shoulder, 90 - 100 gm, Oval Fruits
Duration : first harvest 85 days from Seed Sowing
Very Firm Fruits
Highly Tolerant to BW and TyLCV

HYB RHT 1002

Plant semi determinate, good foliage coverage. Fruit with light green shoulder, oval shape, uniform. Very hard skin, red on ripening. Tolerant to TOSPO and to ToLCV diseases.

HYB RHT 1003

Semi-determinate plant with strong branches, oval round fruit, weight 90-95g dark red at ripening, good for foothills and hill region.

TOMATO RHT 1005

Fruit size - 100-110 gm.
Heat tolerant.
Determinate variety.
Oval in shape.
Moderate to good tolerant to BW, TY AND TLCV.

TOMATO RHT 1006

Heat tolerant.
Determinate variety.
Oval in shape.
Moderate to good tolerant to BW, TY AND TLCV.
Fruit Size : 110-120 gm.

HYB RHT 2001

Plant determinate, good foliage coverage, fruits semi flat, 100-120g with green shoulder. Good tolerance to ToLCV, acidic in nature, suitable for fresh market and kharif sowing.

HYB RHT 2002

Medium tall plant with determinate habit, good foliage coverage, flat round fruit, with light green shoulder, excellent yielder, fruit weight 80-90g medium tolerance to ToLCV.

RTH 2003

Determinate growth

Fruits: No Green Shoulder, 90-100 gm,
Oval Fruits.

Duration: first harvest 85 days from Seed Sowing

Very Firm Fruits

Highly Tolerant to BW and TyLCV

Broccoli

HYB BROCCOLI SUPER

It has an erect, medium frame plant type. It has dome shaped head. The curd colour is white and curd weight is 800-900 gm. It gets matured in 65-70 days. It is a medium maturity hybrid with good heat tolerance.

HYB BROCCOLI SITARE

It has dome shaped head. The curd colour is white and curd weight is 800-900 gm. It has an erect, medium frame plant type with maturity in 70-75 days.

Chilli

HYB TEEKHA

Plant type: Bushy, Fruit Length: 8-10 cm
Fruit Color (Unripe): Dark Green
Fruit Color (Ripe): Red
Pungency: High
Purpose: Dual purpose, Fresh & Dry
Tolerance to Disease & Virus

Ronith Chilli Sweety

Fruits are pendent, shiny light green. Average fruits length is 12-13 cm with 1.3 cm thickness. First picking starts in 65-70 days after transplanting. Suitable for dual purpose.

HYB TANISHA

Bushy and strong plant structure 90-100 cm height, fruit length 10-15 cm, light green, wrinkled fruits with 1.20 – 1.25 diameter, mild pungency.

HYB APARAJITA

Strong erect medium tall plant, green colour fruits. Fruit length 8-9 cm with 0.8 – 1 cm diameter very high pungency.

HYB VASUNDHARA

Plant strong, bushy with dark green foliage, fruit picking starts in 75-80 days, fruits small 6-8cm long with 1.0 cm diameter approx. highly pungent, dark green and very attractive, dual utility purpose.

HYB ROCKSTAR

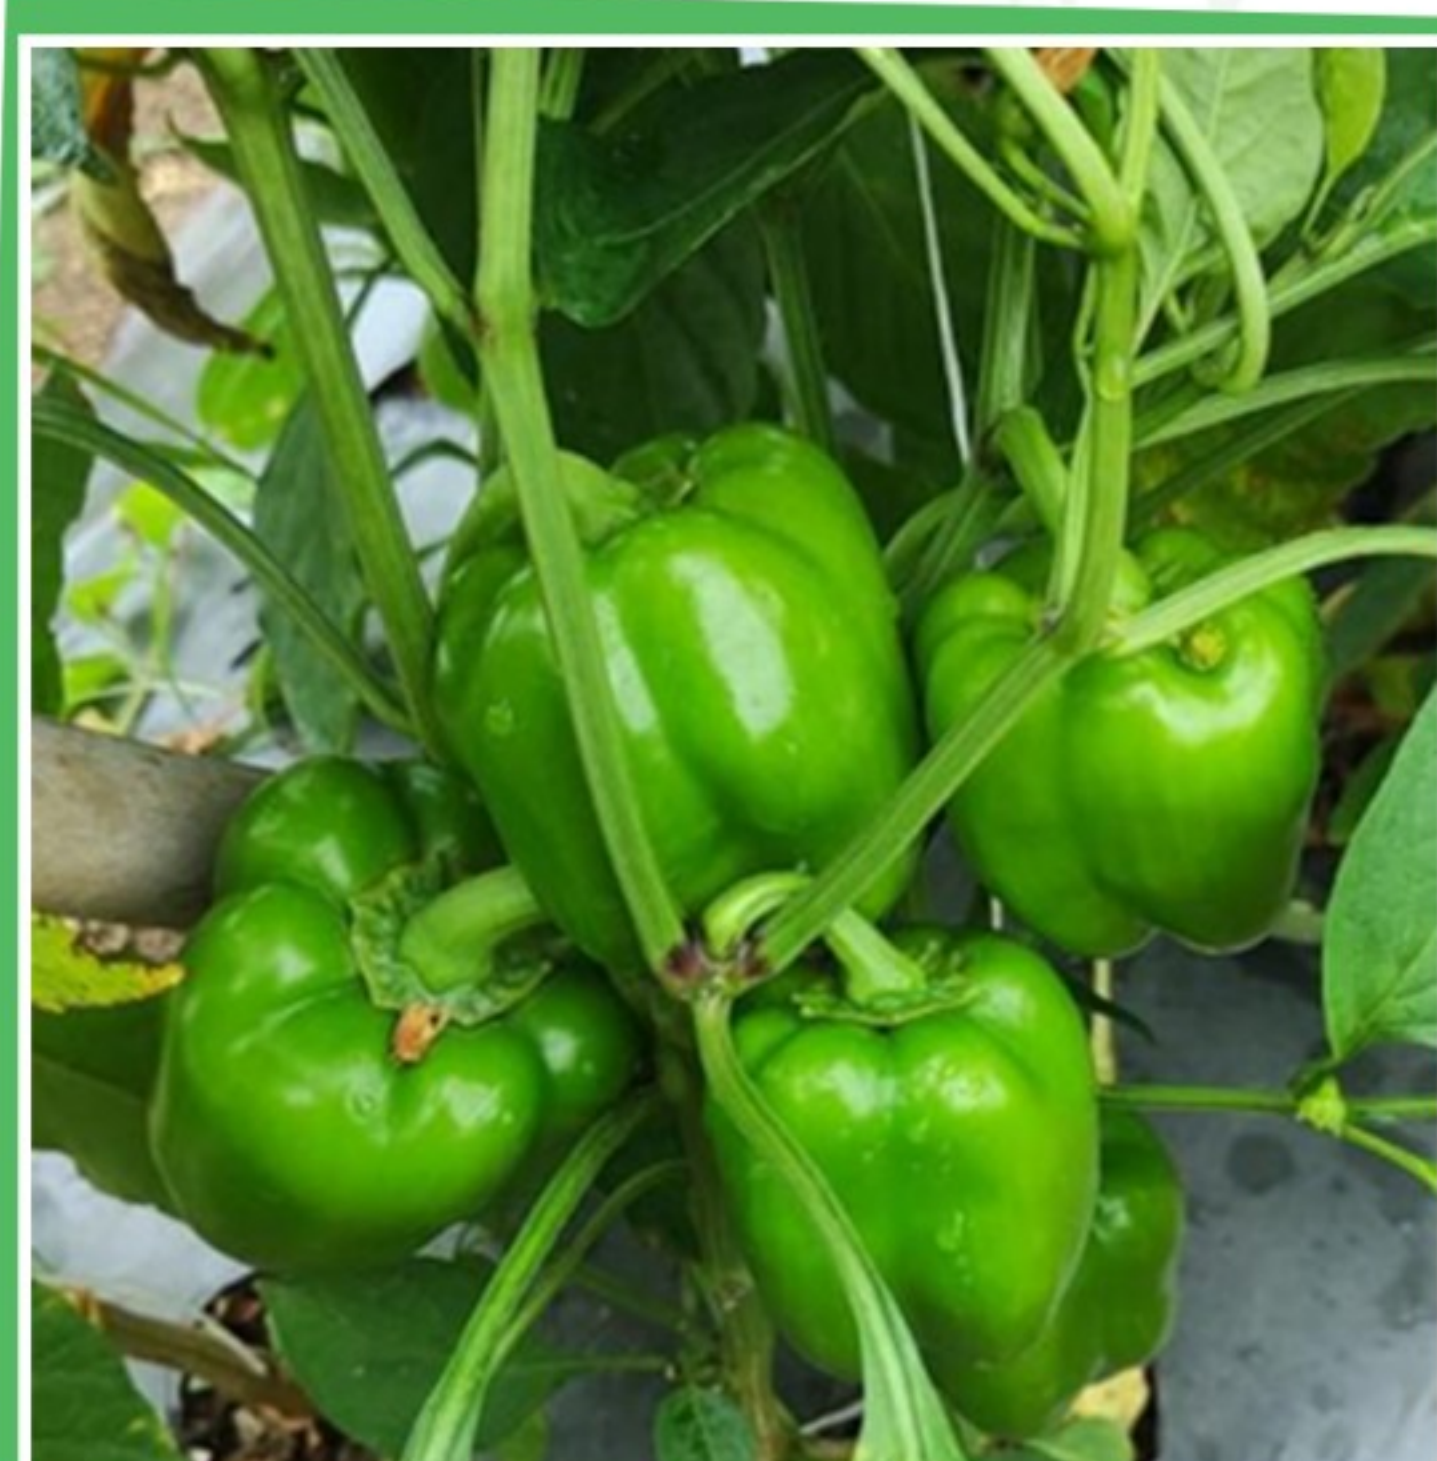

Plant habit erect and vigorous, attractive dark green leaves, fruits 16-18 cm long with 5-6 cm girth. Fruit colour green with medium pungency. Harvesting starts in 55 days.

Capsicum

HYB JOSH

Plant vigorous, medium tall with broad leaves. Fruit dark green, 3-4 lobed, square blocky, 150-180g, harvesting starts on 60-65 days after transplanting. Tolerant to TMV and very high yielding hybrid.

CALIFORNIA WONDER (IMP)

Plant medium tall, erect strong, with dark green leaves. Fruits 100-120g in weight, shining green leaves with thick skin and 4 lobes.

Beetroot

SUNRISE (IMP)

Green foliage with red tinge. Root knobs round with deep red colours. Dark red colour core without white rings, sweet and crispy slices of roots.

Carrot

RONITH NEW KURODA

An early and high yielding variety, 16-18 cm long roots, deep orange with self coloured core, round shoulder, stump roots. Good taste and crispy, excellent shelf life. Ready for harvest in 80-90 days of sowing.

LAAL PARI

Long and tapering roots, dark red in colour with self coloured core, roots very tasty with desired aroma. Excellent use for juice, sweet dish, salad and cooking purpose. Ready for harvest after 90 days of sowing.

RONITH NANTES

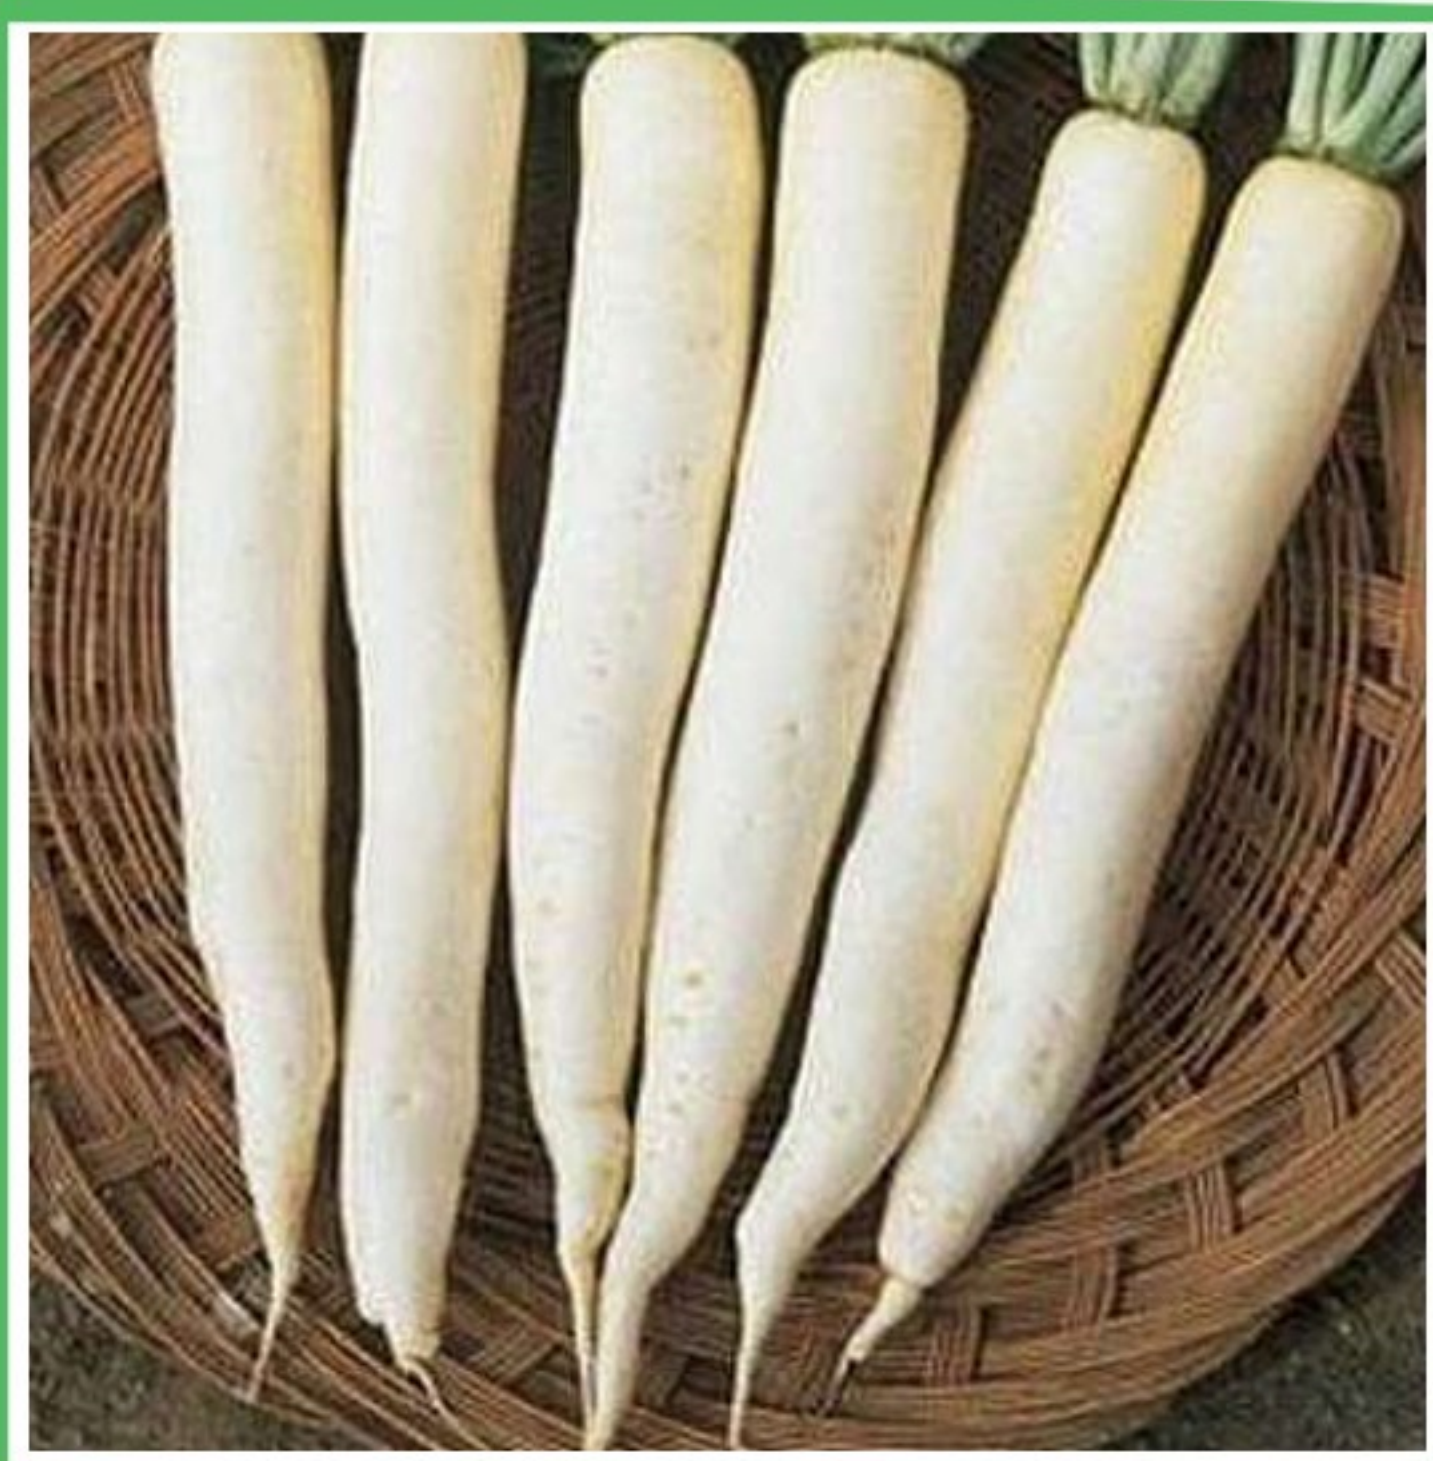

An early and high yielding variety, 20-25 cm long and cylindrical roots, deep orange with self coloured core, good taste and crispy. Excellent transportability and shelf life.

Radish

PALAKPATTA SHIPRA 32

Roots shape: cylindrical tapering, Root length: 30-32 cm, Root colour: white, Maturity: 35-40 days.

CHETKI LONG

Green smooth and entire leaves roots 300-365 cm long, tapering to blunt, white in colour. Early maturity of 38-45 days. Suitable for summer and rainy season.

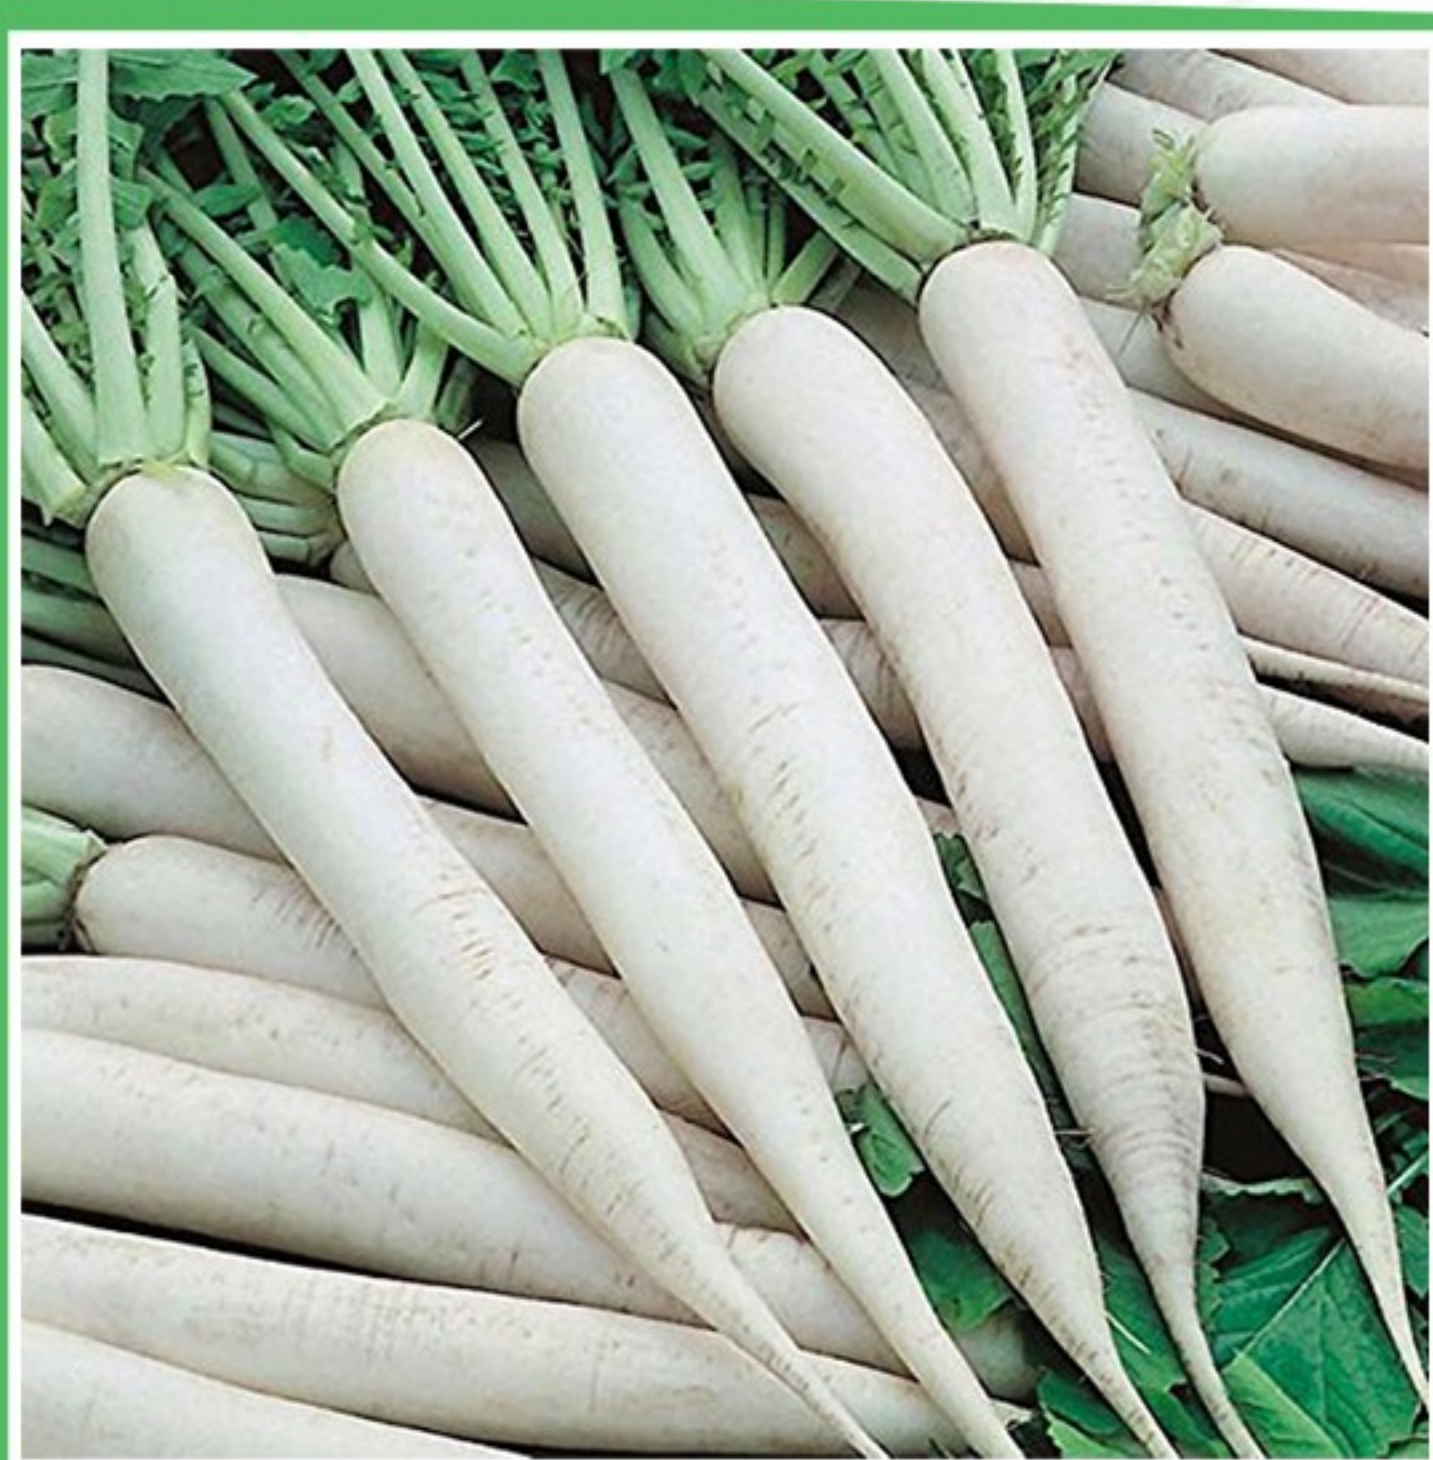

HILL QUEEN

Leaves with deeply serrated margin, long cylindrical roots, very white, without root hairs, matures in 50 days, no pithiness even at over maturity stage. Very tasty with sweetness.

MINOO EARLY

Suitable for August to November sowing in north and east India. Pure white root length 35-40cm. Delayed pithiness.

HYB WHITEMOON

Suitable for September to November sowing. Leaves dark green with serrated margins. Root 40-45 cm long, pure white with delayed pithiness. Ready for harvest in 50-55 days.

HYB CHANDA (X-33)

Very high yielding, heat tolerant hybrid, good palak type foliage, 25-30 cm long roots are white, smooth, crispy with mild pungency.

Bottle Gourd

HYB MADHVI

Light green, broad leaves, fruits 40-45 cm long, cylindrical, light green, fruit weight 1.0 to 1.25 kg harvesting starts in about 60-65 days from sowing. High yielding and cosmopolitan adaptability.

HYB KOMAL

Dark green foliage, 35-40cm long fruit, uniformly cylindrical, pale green fruits weight 0.8-1.25 kg. Harvesting in 55-60 days from sowing. High yielding hybrid with wide adaptability.

HYB SWAGAT 114

Plants with dark green foliage, fruits round with prominent neck (latto type), green, tender with good taste on cooking. Weight 0.8 to 1.25 kg. Prolific fruiting with high yield.

SAMRIDHI

Trailing and continuous fruit bearing habit. Fruits are flat round shape with light green colour. Fruit weight 1-1.5kgs. White flesh and slow seed maturity. Good for long distance transportation.

Bitter Gourd

HYB BILLU

Very short chua type with 5-6cm in length, green, spiny, shiny small spindle, excellent yielder. Good for stuffing and pickling.

HYB VARDAN

Early harvest, fruits 18-22cm in length, thick spindle, dark green, thick and smooth spines. Very high yielding hybrid.

HYB TAKATAK

Vigorous vine with dark green foliage. Spindle and prominent toothed, 18-22cm long with 16 cm girth, 90-100g weight.

HYB MADRID

Fruits 25-30 cm in length, thick spindle, shining dark green, medium thick spine, very good yielding hybrid.

Sponge Gourd

HYB SWAMINI

Plant vigorous, dark green cylindrical, smooth surface medium long fruits avg. Weight of 150 g. Harvesting starts at 55-60 days, high yielding and good quality of fruits.

HYB JULIE

Plant habit very vigorous with green foliage. Fruits medium long, slender. Light green or shiny pale green. Very prolific fruiting.

HYB TAPASYAA

Plants and foliage dark green with vigorous growth habit. Fruits medium long, dark green with prominent ridges, fruits very strong and good in transportation. Heat tolerant.

HYB ZUMBA

Very vigorous plant habit with prolific bearing fruits 45cm long, whitish green colour, fruit weight 400-500g. Harvesting starts at 60-65 days.

Pumpkin

HYB RAJAN

Big size oval round, 8-10kg and orange coloured on maturity. Very high yield in all soil and climatic conditions.

HYB SUDARSHAN

Flat round shaped, 3.5kg to 4 kg, weight and attractive colour on maturity, orange-yellow flesh. Ready for harvest in 90 days.

Cucumber

SUPER STAR

Lush green plants with strong vines, light green fruit, 180-200g weight. Highly adaptive to local conditions. High yielding and suitable for summer as well as rainy season.

HYB MAHI

Vigorous vines, broad dark green leaves, long cylindrical bicolour, light green fruit of 170-180g weight, tasty and crispy, start harvesting in 45 days. Highly tolerant mildews.

Muskmelon

HARA MADHU

Green, vigorous vines. Flattish round, yellowish green fruits with green stripes, flesh light green yellow, ready to harvest in 60-65 days, excellent adaptability throughout country. TSS 11-12 %.

HYB SWEET ROSE

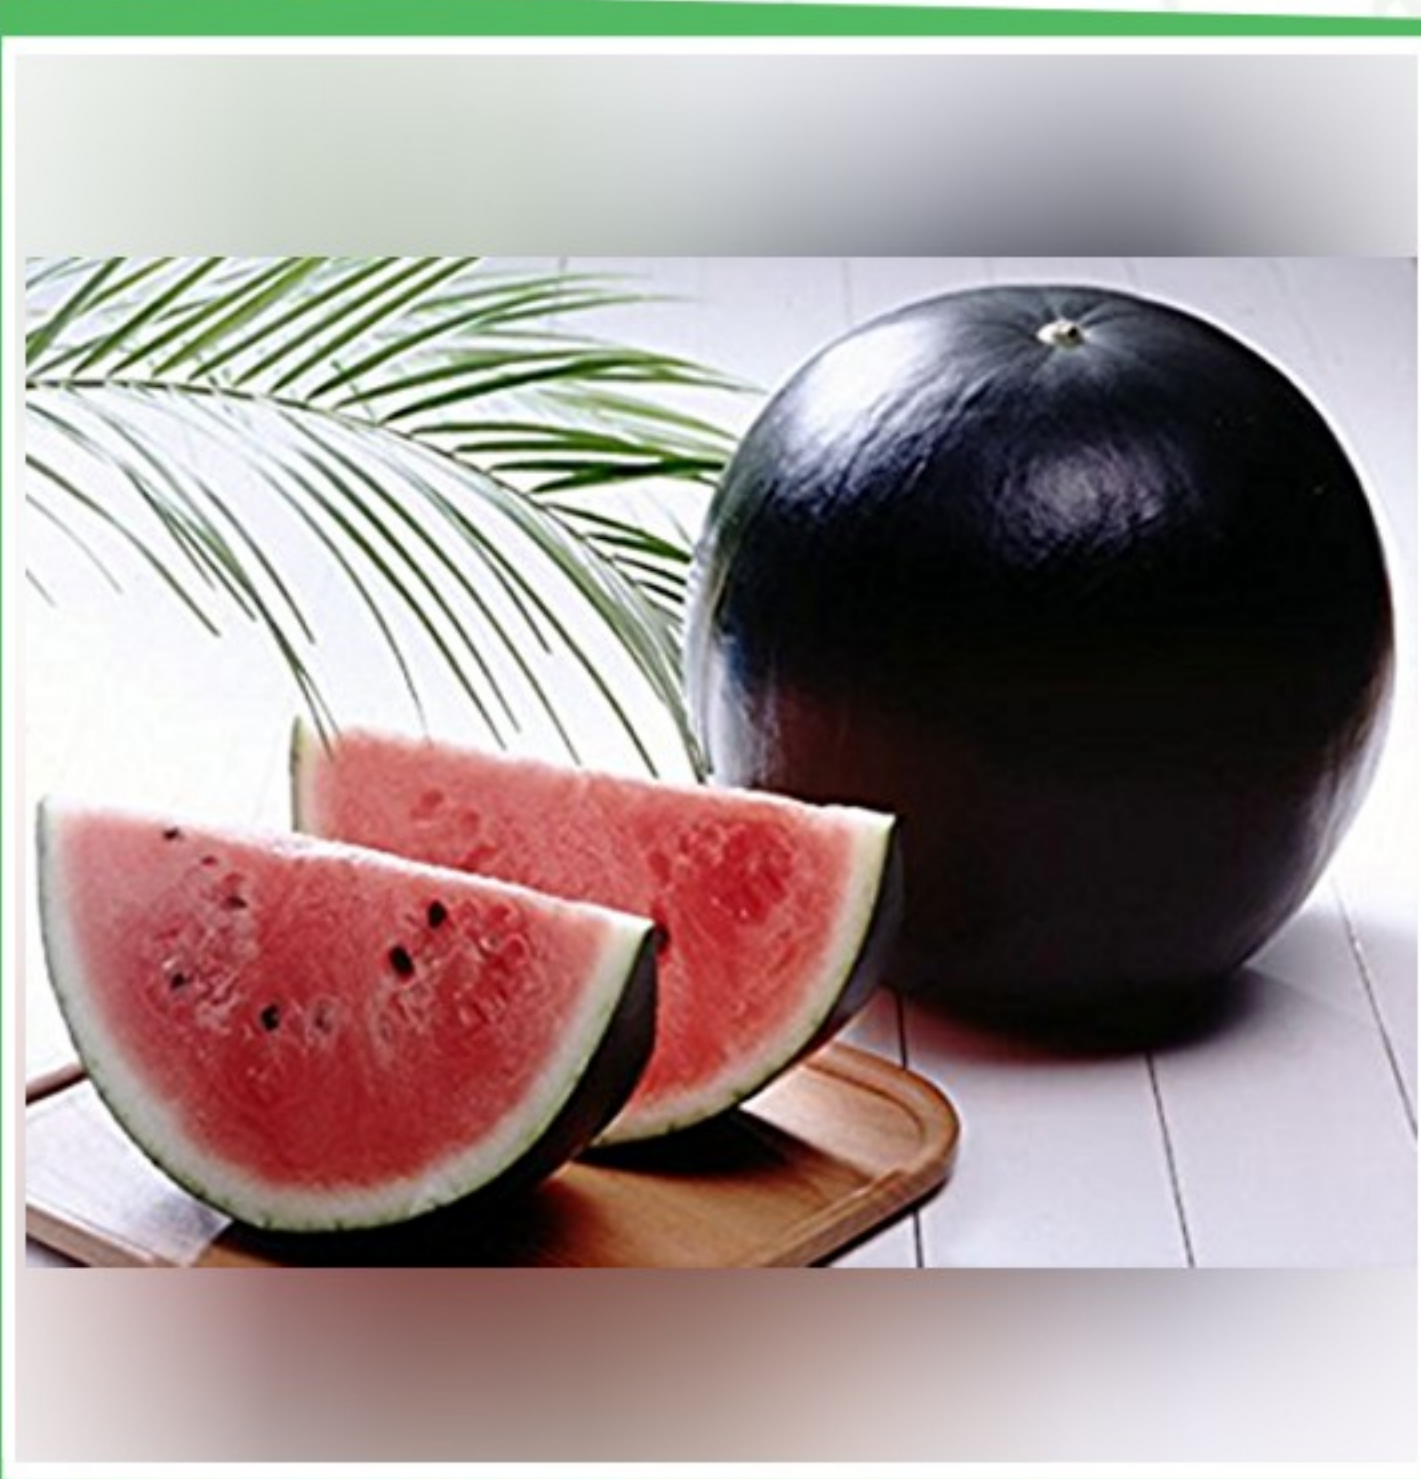

Vigorous plant with good foliage cover, attractive round to oval fruit with uniform net. Fruit weight 1.25-1.75kg. Compact flesh with good texture and deep orange red colour, TSS 13-14%. Sweet and tasty fruit.

MADHURAS OP

Orange colour fruits, with very green strips, flattish round fruits, light yellow crispy flesh. Fruit weight 0.9-1.9 kg, TSS 12-13% harvesting in 60-65 days.

Watermelon

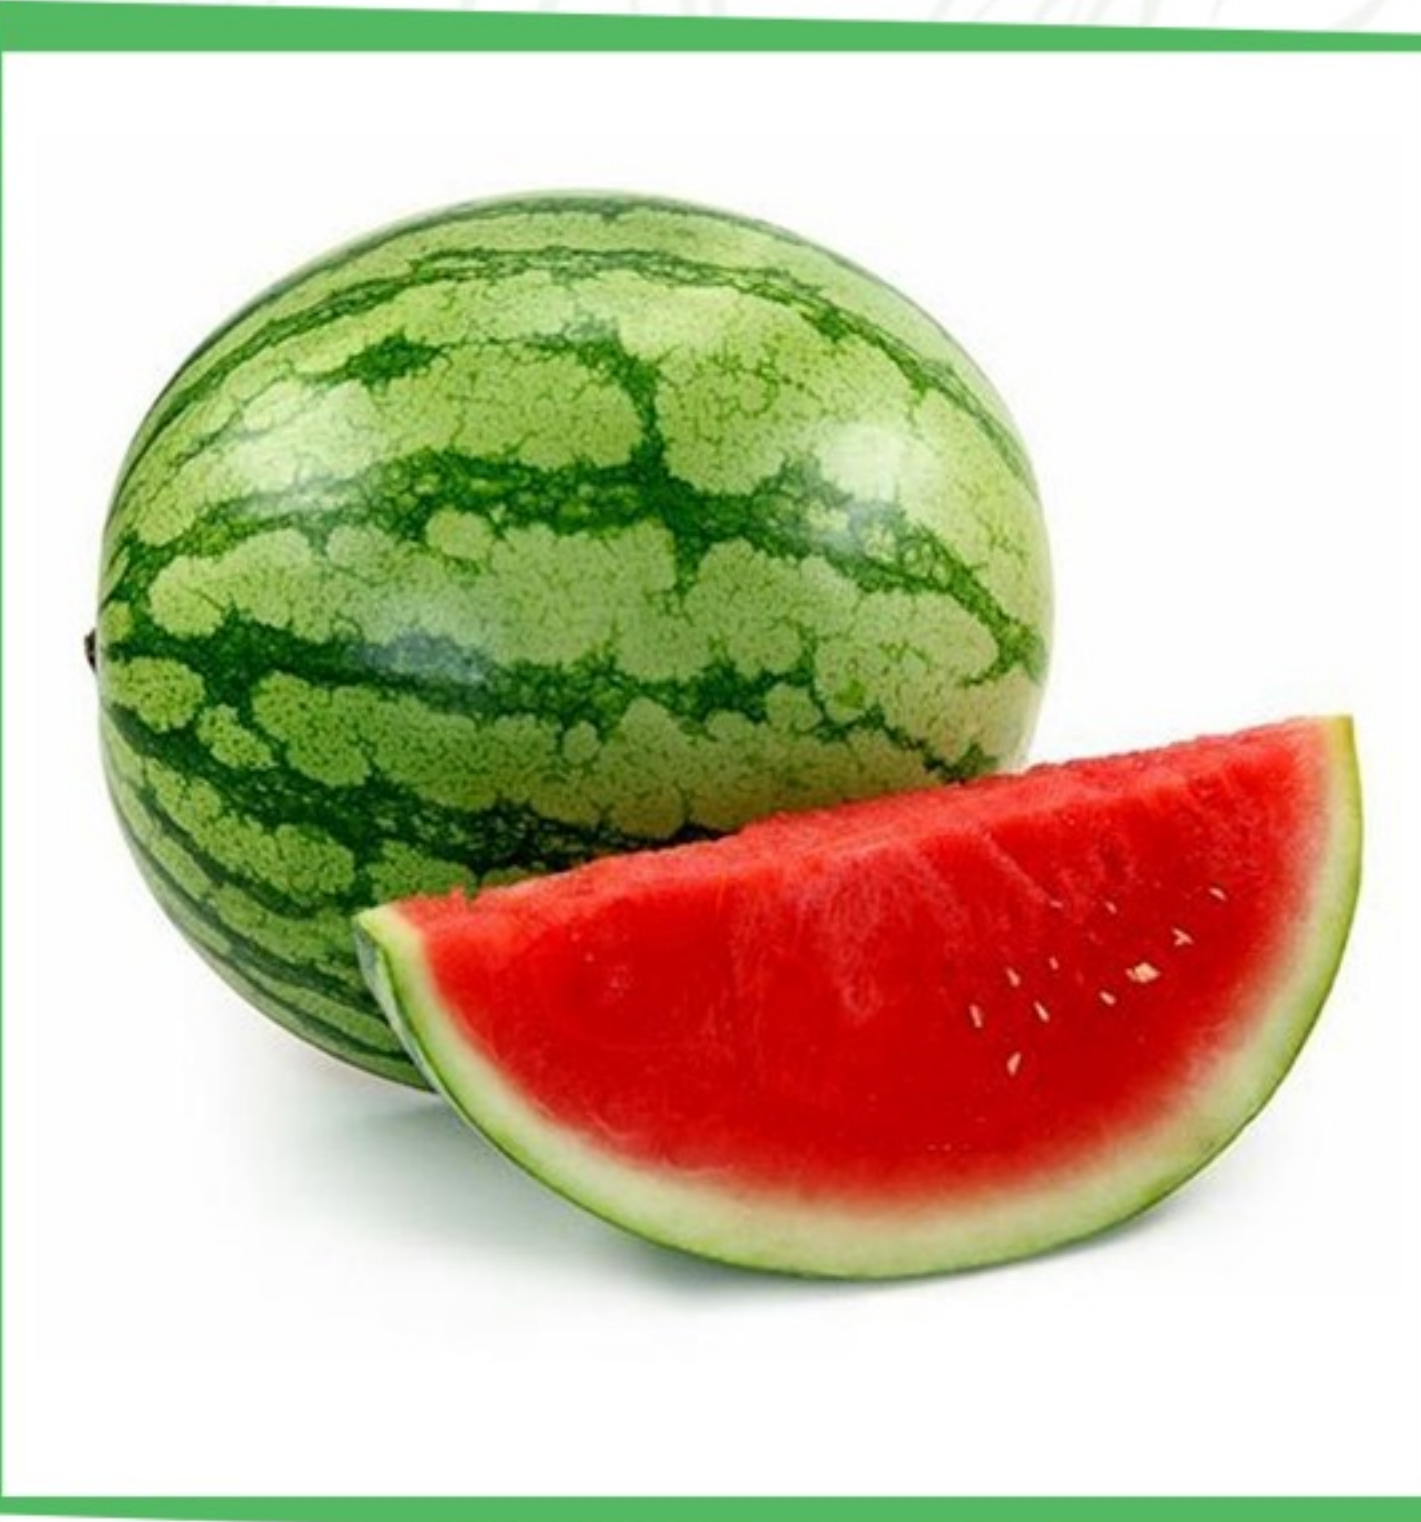

HYB BLACK BEAUTY

Fruit round dark bluish green, 4-5 kg weight, flesh perfect red in colour, TSS 13-14 %, very sweet. Maturity 80-85 days.

HYB NAPOLI

Fruits oval to oblong, just like a rugby ball, dark green rind, weight 2.5 to 3.0 kg, TSS 13%, deep red tight flesh. Excellent transportability and shelf life. Maturity 80-85 days.

HYB VALENTINE

Maturity 80-85 days, fruit 5-7 kg rind light green colour with dark green stripes, oval shape, flesh dark red crimson red colour. TSS 12-13 %, excellent transportability and shelf life.

HYB RUGBY STAR

Maturity 80-85 days, oval to oblong fruits with light green rind and dark green stripes. Fruit weight 8-9 kg, crimson red flesh, TSS 12-13 %. Good transportability and good shelf life.

Tinda

RONITH SPECIAL

Good vigorous vine, very early fruiting, light green to green, round, very tasty and tender fruits with weight of 80-85g. Harvesting starts at 45-48 days.

RONITH LONG

Good vigorous vine, very early fruiting, light green to green, very tasty and tender fruits. High yielding.

Pea

SWEET PEARL (IMP)

Early and dwarf sweet pea variety. Attractive long green pods with 9-10 grains.

HARA MOTI 3030

Early and dwarf sweet pea variety. Attractive long green pods with 9-10 grains.

Beans

FRENCHBEAN – ANUBHA

Bushy, dwarf plant with dark green foliage, green pods 18-20 cm long, stringless and crispy, tender and tasty pods. Very high yielding and prolific bearing.

Onion

RED QUEEN

Suitable for all agro climatic zones. Bulbs are globular in shape, scarlet red, medium to large size, mild in pungency, TSS 11-12 %, maturity in 100-110 days after transplanting.

TEJ

Bulbs are oval to round in shape, light yellow in colour. TSS 12 %. Good keeping quality and suitable for storage for 5-6 months. Maturity in 120-130 days after transplanting.

Coriander

FRESH GREEN (IMP)

Vigorous plant with dark green and broad leaves, late bolting and good aroma. Harvesting starts in 35 days, multi cut. Round the year cultivation. Excellent yield potential.

Spinach

RONITH GREEN

Light green broad foliage, without red/pink tinge, late bolting.
Very heavy yielder multi cut without losing quality.

Sweet Corn

MITHAAS 2003

High tolerance to lodging, strong plant vigor
High TSS: 16% (brix) sugar content
Cob is well covered with husk and filled till tip
Ready to harvest: within 65 – 70 days
Good tolerance Northern Corn Leaf Blight

Marigold

RONITH YELLOW STAR

Plant have profuse branching and excellent vigor.
Medium height Semi Erect plant type.
Uniform flowers with compact petals and bright yellow color.
Harvest ready within 48 – 50 days.
Avg. Flower weight: 20 – 25 gm.
Fairly tolerant to foliage diseases.

RONITH ORANGE STAR

Medium height plant type with excellent vigor.
Uniform compact ball shape flowers with compact petals and bright orange color.
Harvest ready within 60 days.
High Yield and suitable long transportation.
Fairly tolerant to foliage diseases.
